DETAILED ACTION

1. Applicant's arguments, see 3 and 4 of the Appeal Brief, filed 04/20/2006, with respect to "outputting an instruction to the passenger" have been fully considered and are persuasive. The rejection of 07/13/2005 has been withdrawn.

Allowable Subject Matter

2. Claims 1-5 are allowed.

3. The following is an examiner's statement of reasons for allowance: Prior art fails to teach or suggest a system for detecting the position of a person in a vehicle seat, wherein a sensor signal, indicative of the seated position of the passenger, is used to determine if the seat needs to be adjusted, and outputting an instruction to adjust the seat directly to the passenger himself. The major difference between Applicant's invention and that of the prior art is that the instruction output to the passenger is to alert the passenger to adjust the seat manually, while the prior art teaches the adjustment being done automatically.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
